To whom it may concern:
2002

April 26,

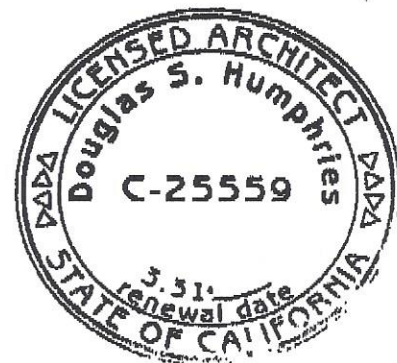

As an Architect working with Alex Rivera on many projects over the past several years I have found Alex to display the highest level of professionalism in his performance in all aspects of completing a building project. From his concerns of keeping his office computer/administrative capabilities state of the art to his knowledge of all aspects of the building trade and pursuit of maintaining his awareness of new and future developing construction products Alex is able to provide quality service to his clients. Alex is reliable, honest, knowledgeable and easy to work with. He is good at communicating with the Architect, consultants and sub-contractors in assuring that the best finished product possible is achieved. Alex's integrity will insure that his clients have a positive building experience and great satisfaction with the results of his work.

I have found that working with Alex is always a pleasure because I know that the project will turn out the way it is supposed to when completed.

Sincerely,

Douglas S. Humphries
Architect, Lic.#C25559
