

Letter of recommendation

To Whom It May Concern:

Alex Rivera and I met on a job site in Beverly Hills. I was the project engineer and Alex stepped in to take over as the general contractor. Alex conducted himself professionally throughout the project. The remodel was completed with due diligence in a timely manner. It was a pleasure working with Alex on this project. Since our initial meeting in Beverly Hills, we have worked together on several projects. Most recently, he completed a patio structure at my personal residence. Again, it was a pleasure working with Alex on my personal residence. Alex paid particular attention to details especially with respect to as-built conditions. The work was performed expeditiously to my specifications in a timely manner. I am very happy with Alex's performance as a general contractor both professionally and personally. He has always been up front and honest with material prices and labor costs. He is personable, reliable, and easy to work with. I would definitely recommend Alex Rivera to friends and Associates for future projects.

Sincerely,
